

CHANGING THE ENTERPRISE

Colin Humphreys - @hatofmonkeys

CloudCredo

AGENDA

- Colin ruins your day
- Colin tells you you're doing Cloud wrong
- Colin tells you you're doing agile wrong
- Colin tells you to kill your products

SPOILER!

CLOUD FOUNDRY IS
NOT EXCITING!

Cloud Foundry will not differentiate you.

Your applications will.

"Software is now so trivial to make
you can make lots of things
and learn from them"

Paul Downey

WHAT HAVE CLOUDCREDO LEARNED?

Cloud Foundry Retrospective
from our enterprise customers

- Innovation in Infrastructure
- Waterfall for Applications
- Building big. Microservices happened
- Continuous delivery without continuous feedback: metrics, pairing, TDD

- Start with someone else's CF
- Start with a small product in a lab environment
- Create learning teams, and support them
- Learn from your customers, be brutal with your products

What does this mean for the Cloud-Native Enterprise?

The Cloud-Native Enterprise
is a venture capitalist
creating continuous innovation
powered by Cloud Foundry
