Practitioneers with an impressive trackrecord in succesfull delivered Cloud Foundry Projects

We transform industries

Selected examples

Manufacturing

Telecommunication

Retail and Logistics

Healthcare

Manufacturing

Before

Today

Central IT Services:

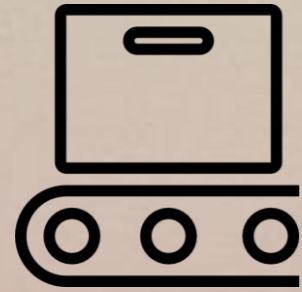

- Each Business unit requested own hardware and development stack
- Huge efforts in virtual machines and deployment strategies
- Admin Overkill

→ Manage budgets

Central IT Services:

- IT Service runs central PCF platform
- IT Service is running a marketplace

→ Managing a marketplace as a profit centre

Retail and Logistics

Before

Today

Central IT Services:

- Each Business unit requested own hardware and development stack
- Huge efforts in virtual machines and deployment strategies

→ Manage budgets

Central IT Services:

- External agencies are able to deliver Apps for various use cases, e.g.:
 - Cash register systems
 - Track and trace
 - Online shopping
 - Indoor navigation
- Fast implementation of new apps

→ Managing a marketplace

Telecommunications

Before

Today

Central IT Services:

- Amazon Webservices utilizing their monopoly
- Shadow IT thrived

→ Missed Opportunities for new services

Central IT Services:

- Offer AWS like Services with additional benefits, e.g.
 - US-Patriot act
 - Save European and Swiss datacenters
 - Internal Cost center allocation
 - Automated provisioning
- DevOps

→ Continuous Deployment

Healthcare

Before

Today

Central IT Services:

- Complex and time-consuming Approvals for Medical devices (FDA)
- FDA approval need to be repeated for each application and each release.

→ Very long innovation cycles

Central IT Services:

- PCF Platform is certified once by the FDA
- Applications and micro-services are used to build new apps without the need to have a full certification loop

→ short innovation cycles and cost savings
